

Sound proof cabinets for ultrasonic baths

Sonation series USBB

**-30dB(A)
Over 90% reduction in noise**

Easy access

Space-saving

Robust construction

Active ventilation

- Noise reduction up to 30dB(A) which is a drop in noise by over 90%. The cavitation noise is practically eliminated.
- Available in three different sizes for mostly all ultrasonic baths.
- The cover can be completely opened, so the removal of the basket is very easy to handle.
- There is no additional space needed to open the cover, so the box can be placed and operated under the extractor hood or under lab cabinets.
- Control panel stays visible. Thanks to the transparent front, the progress of the washing program can be observed anytime.
- Equipped with fast access openings on the front and both sides to operate the ultrasonic bath or to drain the cleaning agent.
- Integrated fan to remove vapors.
- Recessed grips on the sides for easy transportation.
- Oil and water repellent and flame-retardant acoustic foam.
- Powder coated, robust and easy cleanable surface.
- Cushioned opening mechanism for smooth and easy handling.
